

Studebaker
QUALITY
MOTOR CARS

MORE ROOM PER DOLLAR

This is the first FULL 7-PASSENGER, 40 horse-power Touring Car ever offered in America or Europe at less than \$1000.

In the face of a sweeping reduction in price Studebaker has increased the quality of this car.

Wherever material has been changed, better material has been used.

Better leather, better paint and varnish work, better steels, essentially better manufacturing or inspection standards are not possible—and the price of this 40 horse-power Seven Passenger Car is only

\$885

LIGHT CROPS IN APACHE COUNTY DUE TO FROST

Grain Falls Off Somewhat as Result of Early Cold—Farmers Present Fine Scene of Optimism

(Special Correspondence.)

ST. JOHNS.—Light grain crops are reported in the south end of Apache county this year. At Springerville, Eagar and Colon the farmers got as much straw as they usually get, but only threshed about one-half as much grain as they did last year. At Alpine frost got the oats and the yield was about 15,000 bushels, as against 20,000 last year. At Natrona the crops fell off about one-third. The cause was early frost.

ATHLETICS

On Thanksgiving day the local academy sent its basketball team and some wrestlers to Snowflake to meet the athletes of that school. The Snowflakers' first team won, but the second team of St. Johns scored, while the wrestling matches ended in a draw.

St. Johns is having some cold weather at last. The fall has been extremely good. Cattle and sheep are as fat as they were in the middle of September, when they are usually at their best, and all who have ranges with sufficient water are jubilant but some of the cattlemen are needing more water on their ranges.

Dr. T. J. Boudin has just returned home from spending two weeks at the fair at San Francisco.

Mr. and Mrs. M. H. Peterson have just returned from a visit of two months in Utah.

There have been three cases of diphtheria in the home of J. S. Gibbons. Nels, the 10-year-old son, died yesterday, but the other two are doing well.

WINSLOW QUINTS READY TO RECEIVE COYOTES

WINSLOW, Dec. 4.—The Phoenix basketball team will arrive in Winslow December 11 after having played the Prescott high school girls and boys on the preceding day. This will be the Winslow "H's" second game of the season, and with a month since they last one, they have put in some hard practice, which is to bring them up to the minute. Entertainments have been arranged for during the visitors' stay in Winslow, commencing with an automobile trip to the points of interest around Winslow, and after the game a dance. This is the first time that any team south of Prescott has ever ventured so far north, and the interest in Winslow and surrounding country is keen. Captain R. Sutherland of the boys' team to which they were submitted. For facts of the game the honors go to cars from Kalamazoo, Mich., Seattle, Wash., Portland, Maine, Aberdeen, S. D., and Coffeyville, Kansas, though the last named car did not participate in the reliability run.

STUDEBAKERS BREAK FAST TRAIN RECORD

The recent 1900-mile reliability run participated in by upwards of 100 Studebaker cars in as many different parts of the country, furnished the most severe test ever recorded for the road ability of any car, but in every instance a perfect score was recorded.

It was a test of the reliability of the Studebaker car and the 1,000 miles were to be covered within 48 hours' actual running time and there was no suggestion that any entrant try to attain speed records; nevertheless, several new speed records in certain parts of the country, widely scattered, were established.

On more than one run the best train record was bettered by Studebaker stock cars which had received no special preparation for the ordeal.

its regular meeting this week. Julius Pitrat read an instructive paper on "The Arrowrock Dam Project" of Boise, Idaho. This dam, Mr. Pitrat said, is 350 feet high, and will be, when finished, one of the largest artificial irrigation reservoirs in the United States.

Professor Waterbury showed a number of stereopticon views of the Roosevelt dam, irrigation storage water, which is of so much importance to the development of agriculture in the west, covered a good part of the discussion of the evening.

SOCIETY

The football banquet, served in the dining room a few nights ago, was one of the most popular events of the season. The hall was beautifully decorated with chrysanthemums, carnations and pepper plants. At one end of the room was a large purple pennant with a yellow "W" in courtesy to the Whittier team, while at the other end was a large blue pennant with a cardinal "A". Between the courses of the banquet an enjoyable musical program was rendered.

The Kappa Sigma Fraternity gave a dance in honor of its new members at Odd Fellows' hall, last Saturday. The program shows the Kappa Sigma coat-of-arms. Punch was served during the evening.

"WRANGLERS"

Miss Anna Pistor entertained the "Wranglers" at her home on November 27. The first part of the time was devoted to the business of the organization. It was decided to study this year the work of a few of the modern dramatists. The new members were selected. Among the members of this five organization are Misses Inez Thiff, Ruth Reed and Zella Jay from Phoenix, Miss Mary Jolly, Jerome, and Miss Nydia Acker of Prescott.

Sigma Pi Alpha announces a masquerade dance in Herring hall, Saturday night, December 4. University students, faculty members and friends of the fraternity are invited.

Miss Ethel Stabler of Phoenix, has been the guest of Miss Esther Wright the past week end.

UNIVERSITY NOTES

By C. E. Grassick

ECONOMIC PRIZES

To stimulate interest in the study of the commerce and industry of the United States, the clothing firm of Messrs. Hart, Shaffner & Marx, of Chicago, offer the following economic prizes: one thousand dollars five hundred dollars, three hundred dollars and two hundred dollars for the best papers on subjects ranging from the effect of the European War on the future of interest. The relation of credit and exchange between the United States and South America; The economic effect of the entrance of Japan upon the Chinese mainland; to the critical study of appropriations for rivers and harbors; critical examination of recent fiscal policy of the United States; and The needs and future of American shipping. The opportunity to try for these prizes is open to all undergraduates of the university, and a sharp competition is expected.

CADETS

Much to the delight of Colonel Brown, captain Browne, and the ca-

deets, the new uniforms have arrived. The drabs now present an attractive appearance. With the new uniforms and the rapid progress that is being made in the drill, Arizona's cadet battalion presents an appearance that will be hard to surpass anywhere.

STUDENT SONGS

There is a new interest being taken in Arizona college songs since Dean Butler's prize offer. It is a fact that college songs are the best evidence and stimulus of college spirit, and considerable interest is now being evinced in the collection of a group of songs which represent the traditions and ambitions of the university.

ASSEMBLIES

Morning assemblies are proving one of the most popular institutions on the campus. The assemblies are conducted by the president, and in his absence usually Dr. Douglass, dean of the College of Letters, Arts and Science. Interspersed with good wholesome talks on student conduct and ambitions, are musical treats by well-known artists. Students conduct the assemblies on Fridays when any matter affecting the student welfare can be brought up and discussed before the faculty.

SAXON SIX

A big touring car for five people

Saxon High Speed Motor —this year's favored type

Saxon engineers know that a small sized gasoline motor running at high speed gives as much power as a larger motor of the slow speed type. At the same time it consumes far less gasoline, and greatly reduces the weight of the car.

These are facts which Saxon engineers have developed and which all engineers now recognize. So today the high speed motor is the ideal of most designers.

Saxon "Sixes" are built with the wonderful Saxon high speed motor. Experts marvel at its power. Ralph De Palma, the world's greatest racing driver, said the feat of Saxon "Six" in climbing the steep three-mile mountain road at Uniontown, Pa. in 4 minutes and 4 seconds was "the most astounding feat I ever saw."

The smoothness and flexibility of Saxon "Six" are a constant delight to owners. To them two miles an hour "on high" is not a "stunt" performance, but an ordinary incident in daily driving. Ex-

cept for starting the car, gear shifting is practically unknown to Saxon "Six" drivers.

Saxon "Six" also offers you many other features of advanced motor car design. Chief among them are: Light weight with ample strength, saving tires and gasoline; beautiful yacht-line body, the most modern type of body; ample room for all five passengers.

Fully to appreciate this car you must see it. Come in today.

Six-cylinder high speed motor, 30-35 h. p.; yacht-line body; two-unit electric starting and lighting; demountable rims; one-man top; Tomken axles; vacuum steel coilover springs; 112-inch wheel base; 32-inch x 3 1/2-inch tires non-skid in rear.
